

Crestron Control Solutions One Platform Conference 2008

The Crestron Control Solutions One Platform Conference was held at the Marriott Hotel Sydney on Thursday 16th and Friday 17th October 2008.

Over 130 delegates attended the two day event that involved presentations from Australian and international Crestron experts.

The Crestron team was proud to host Randy Klein, Executive Vice-President, Jason Tirado, International Sales Manager and Dave Silberstein, National Product Sales Specialist from Crestron Electronics US.

Randy Klein and Stuart Craig presented keynote addresses at the beginning of the conference providing a clear indication of the future of Crestron, CCS and the industry. Dave Silberstein presented a number of sessions including Digital Media, Crestron's complete HDMI distribution solution being released in 2009. Dave also covered Roomview and Future Crestron Products. Randy, Jason and Dave were also available to answer delegate questions throughout the conference.

Sessions presented by our local experts included Crestron MediaManager™, Crestron Signal Transport Solutions and Crestron Energy Management Systems. The Crestron Adagio True HD Theatre and Audyssey MultiEQ XT demonstration impressed all in attendance.

On Thursday night delegates were treated to a harbour cruise around picturesque Sydney Harbour for the Crestron Control Solutions Gala Awards Dinner. If watching the sunset under the harbour bridge was not enough, delegates were also able to try their luck at the on-board casino and test their skills with laser clay pigeon shooting. Congratulations to Dee Bubeck from Len Wallis Audio who took out the prize for the casino night.
